

Focused on the exploration and development of gold deposits within the Juruena belt of western Brazil

- **Experienced Management Team**
4 gold discoveries in Brazil with NI 43-101 compliant resources totaling +5Moz.
- **Brazil focus**
12 license areas comprising +200,000ha in prolific Juruena gold belt (7–10M oz of artisanal gold production).
- **Advanced Cajueiro project**
With a NI 43- 101 resource of Indicated Resources of 214,000oz Au and Inferred Resources of 204,000 oz Au and an additional 79,000 oz at 1.61 g/t Au in oxides (as Saprolite). Two new zones discovered in 2017.
- **48.6M shares issued. No debt.**
- **Drill results pending** from early stage of Crepori project.
- **Recently extended** Baldo East zone with high-grade trench results

Cajueiro Project

- Historic placer gold workings previously produced +250,000oz Au
- NI 43-101 compliant resource based on 11,292m of drilling – 8.64Mt at 0.77 g/t Au (for 214,000oz) of Indicated resources and 9.53Mt at 0.66g/tAu (for 204,000oz) in the Inferred resource category and additional 1.37Mt at 1.61 g/t in Oxides (for 79,000oz)
- Two new zones discovered at Baldo East and Toninho during mid 2017, i.e. 6m @ 21.7 g/t in trench 20 and @5.53 g/t in trench 25.
- Soil sampling has identified 10 gold anomalies of which 4 have been only partially drill tested.

Crepori Project

- 8,323 ha with historical small scale production
- Good access. Located 105 km SSW of Eldorado Gold's TZ project which is expected to produce 170,000oz / year
- Extensive placer workings cover several square km and recovered +0.5M oz. No previous drilling.
- Surface sampling has returned values up to 1022.98 g/t gold with approximately 10% of surface samples returning +5 g/t gold
- Drilling results pending
